# RADIANT BOARD™

## A **high-performance** modular radiant board system

**Remodel & New Construction**

## Thoughtfully designed for today's construction -- featuring **maximum comfort and value**

**EFFICIENT | COST-EFFECTIVE**

Our thermodynamically appropriate aluminum layer + easy-to-arrange boards + easy tubing installation = optimum performance, flexibility, affordability and ease. A win-win for both installers and owners.

**EARTH FRIENDLY**

The only available FSC-certified radiant board product, using aluminum with recycled content on USA 6-7-ply plywood. Glue no-VOC when cured.

**EASY TO ORDER | EASY TO INSTALL**

Visit our website for a free quote, easy online ordering and our Installation Manual. We ship factory direct to job sites.

## VERSATILE MODULAR BOARD SYSTEM

**STRAIGHT: 62% of most jobs**

**SUPERCOMBO: About 38%**

**Ecowarm Radiant Board™** is manufactured from FSC® certified plywood from sustainably managed forests. Its heavy recycled aluminum layer is bonded with a water-based VOC adhesive. Cut from standard 4' x 8' plywood sheets, both straight and supercombo finished board measurement is 47" x 23.5". Tubing (1/2" PEX) is spaced 11.750" on center. One-quarter radius turns measure 5.935" from the edge.

## PRODUCT INFORMATION

- BOARD WEIGHT:** Approximately 2.3 lbs per square foot, 18 lbs per board
- PALLET SIZE:** 4'x4'x32" tall (2 boards per row, 37 rows high, 74 board total)
- PALLET WEIGHT:** Approximately 1370 lbs. (smaller pallets by special order)
- PALLET APPEARANCE:** Shrink wrapped, corner protected, part #s color coded
- TRUCKLOAD QUANTITY:** Approximately 20,007 square feet
- RECOMMENDED MIX:** Straight 62%, Supercombo 38%, +5-10% extra/waste
