2X Aluminum Thickness

NEW PREMIUM OSB SUBSTRATE

COMING TO ECOWARM

↑ YOUR CHOICE ↑
SAME PRICE

Quality custom home builders across North America have developed a preference for either our traditional high quality plywood subfloor material, or the more recent arrival of our premium OSB subfloor material from the makers of Advantech.

Now you can simply choose your substrate preference. The aluminum on our premium OSB panel is twice the thickness of the premium ply option, providing slightly faster response time.
